

# JOST Coating Service

Systematic Coating

Through synergies with our core business you will profit from shortest cycle times (48h guarantee), competitive prices and logistics expertise. Hereby you will obtain coatings and services which meet the highest standards of the automotive industry. To be sure we are also certified according to ISO/TS16949.

# Systematic Coating

## State-of-the-art coating techniques

Due to various techniques in our coating centres we can offer you customized solutions for your coating requirements.

### E-Coating

Our E-Coating process is based on highly efficient equipment and state-of-the-art, environmentally friendly coating systems. The coating system with a zinc phosphate pre-treatment and high edge paint is optimized for highest corrosion protection on all surfaces. A detailed process description can be found on [www.jost-world.com](http://www.jost-world.com)

### Liquid coating

Coating with efficient electrostatic application systems and customized colours.

### Powder coating

Coating possible with customized colours

### Hydro immersion prime coating

## Locations Europe-wide

All 4 European locations will provide you with the same quality in coating, services and environmental standards. This is guaranteed by the certifications TS16949 and ISO 14001.

	Neu-Isenburg Germany	Nowa Sól Poland	Veszprém Hungary	Wolframs- Eschenbach Germany
E-coating	X	X	X	
Powder coating		X	X	X
Liquid coating	X	X	X	
Hydro prime coating			X	
Zinc phosphating				X
Shot blasting		X		X

**Lamination strength** 20-50 µm

**Measures** 2.5 x 1.5 x 1.5 m ( LxHxB )

**Weight** 0.1 – 150kg max.

## OEM Quality

Profit from our experience as one of the leading suppliers in the commercial vehicle market. Our coatings are checked and released by all major OEM's according to their standards. We will also support you with sampling inspections and constant quality control.

## Services

Demand also our complementary services all around your product. Among these are activities prior to coating, such as incoming goods inspection, machining and masking as well as the completion by assembly and packaging.

## Consulting services

Due to our experience with coating customers on the OEM side (e.g. Daimler) as well as the supplier side (e.g. Wabco) we are able to advise and support you before project launch. Take advantage of the expertise of our production and logistics' specialists.

## Logistics

Our certified production logistics will guarantee you shortest cycle times (max. 48h) and maximum flexibility. If required, we will support you with our already implemented standard interfaces to the truck OEM's.
