Go east: new JOST office in Moscow

JOST has been represented in the major Russian market since the 1990s. By opening a new branch office in Moscow, JOST hopes to further build on its successes in this significant market.

JOST Rossija will start business on 01/11/2004 under the auspices of general manager Georg Krutov. The large central warehouse in Moscow and various regional partners will allow the company to supply the complete range of JOST and ROCKINGER products nationwide – even as far as Siberia.
