RO*57 **ROCKINGER expands product range**

ROCKINGER is a household name for high quality towing hitches, and has been a part of JOSTWorld since April 2001.

With the new RO*57 range ROCKINGER introduces for the first time a hitch suitable for the 57.5 mm towing eyes according to the Swedish standard. It's particularly high load capacity is demonstrated by a D-value of up to 300 kN and a V-value of up to 95 kN.

This towing hitch is characterized by it's low maintenance by means of universal grease for all temperatures. It is easy to repair due to split funnel and ROCKINGER modular engineering. The RO*57 is also available in light weight version (saves over 10 %).

A further advantage is the availability of a new air operated remote control ex factory or as an upgrade kit. The customer can choose either the basic version (actuating to open) or the comfort version (actuating to open and close).

The installation of the hitch is made easier by the groove lock.

The new air operated remote control is also suitable for the RO*500.
