Disclaimer

THIS PRESENTATION IS CONFIDENTIAL AND MUST NOT BE RELEASED, PUBLISHED, TRANSMITTED OR DISTRIBUTED, IN WHOLE OR IN PART, DIRECTLY OR INDIRECTLY, INTO OR WITHIN THE UNITED STATES OF AMERICA, CANADA, AUSTRALIA, JAPAN OR ANY JURISDICTION WHERE SUCH DISTRIBUTION IS UNLAWFUL.

This presentation (the “Presentation”) was specifically prepared by JOST Werke AG (the “Company”) for informational purposes only. It is intended to provide a general overview of the Company’s business and does not purport to include all aspects and details regarding the Company. The Presentation must not be reproduced in any form, employee on or otherwise made available, directly or indirectly, to any other person, or published or otherwise disclosed, in whole or in part, for any purpose, without prior written consent by the Company. Neither the Company nor any of its directors, officers, employees or advisors, nor any other person makes any representation or warranty, express or implied, as to, and accordingly no reliance should be placed on, the fairness, accuracy or completeness of the information contained in the Presentation or of the views given or implied. Neither the Company nor any of its respective directors, officers, employees or advisors nor any other person shall have any liability whatsoever for any errors or omissions or any loss howsoever arising, directly or indirectly, from any use of this information or its contents or otherwise arising in connection therewith.

This Presentation is neither an advertisement nor a prospectus and does not, and is not intended to, constitute or form part of, and should not be construed as, an offer to sell, or a solicitation, invitation or inducement to purchase, subscribe for, underwrite or otherwise acquire any securities of the Company, nor should it, or any part of it, form the basis of or be relied on in connection with or act as any inducement to enter into any contract to purchase or subscribe for any securities of the Company, nor shall it, or any part of it, form the basis of or be relied on in connection with any contract or commitment or investment decision whatsoever. This Presentation and the information and opinions contained therein are selective in nature and do not purport to contain all information that may be required to evaluate the Company and/or its shares. The information and opinions contained in this Presentation are provided as of the date of this Presentation and may be subject to updating, revision, amendment or change without notice. Neither the Company nor any of its directors, officers, employees or advisors are under any obligation to update or keep current the information contained in this Presentation or to correct any inaccuracies in any such information which may become apparent or to provide any additional information whether as a result of new information, future events or otherwise.

This Presentation contains forward-looking statements relating to matters that are not historical facts. These statements reflect the Company’s current knowledge, intentions and beliefs as well as its current expectations and projections about future events, including the Company’s prospects, growth, strategies, the industry in which it operates and potential or ongoing acquisitions. Forward-looking statements can be identified by the context of such statements or words such as “anticipate,” “believe,” “estimate,” “expect,” “forecast,” “intend,” “plan,” “project,” “target,” “may,” “will,” “would,” “could” or “should” or similar terminology. By their nature, forward-looking statements are subject to a number of risks, uncertainties and assumptions, many of which are beyond the Company’s control, that could cause the Company’s actual results and performance to differ materially from and adversely affect any expected future results or performance expressed or implied by any forward-looking statements as a result of various factors (including global economic conditions, market conditions, competition, costs of compliance, changing political, legal, economic and other conditions). Forward-looking statements should not therefore be read as guarantees of future performance or results and will not necessarily be accurate indications of whether or not such results will be achieved. Similarly, past performance should not be taken as an indication of future results, and no representation or warranty, express or implied, is made regarding future performance. In addition, even the development of Company’s projects, growth, strategies and the industry in which it operates are consistent with the forward-looking statements contained in this Presentation or past performance, those developments may not be indicative of the Company’s results, liquidity or financial position or of results or developments in subsequent periods not covered by this Presentation. The Company undertakes no obligation to release the results of any revisions to any forward-looking statements in this Presentation that may occur due to any change in its expectations or to reflect events or circumstances after the date of this Presentation. To the extent available, the industry and market data contained in this Presentation is derived from third-party sources. Third-party industry publications, studies and surveys generally state that the data contained therein have been obtained from sources believed to be reliable, but that there is no guarantee of the accuracy or completeness of such data. In addi- tion, certain information in this Presentation is selective and may not necessarily be representative for the Company. Further, some of the industry and market data contained in this Presentation is derived from the Company’s own internal research and estimates based on the knowledge and experience of the Company’s management in the market in which the Company operates. While the Company believes that such research and estimates are reasonable and reliable, they, and their underlying methodology and assumptions, have not been verified by any independent source for accuracy or completeness and are subject to change without notice. Accordingly, no reliance should be placed on the industry or market data contained in this Presentation.

Subject to limited exceptions described below, the information contained in this Presentation is not to be released, published, transmitted or distributed within or into the United States of America (“United States”), Australia, Canada or Japan and does not constitute an offer of securities for sale in any of these jurisdictions. Any securities offered by the Company have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the “Securities Act”), or the securities laws of any state or other jurisdiction of the United States and such securities may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable state or local securities laws. This Presentation does not contain or constitute an offer of, or the solicitation of an offer to buy or subscribe for, securities to any person or in any jurisdiction to whom or in which such offer or solicitation is unlawful. Any failure to comply with these restrictions may constitute a violation of applicable securities laws.
Key Developments – Q2 2020

Post merger integration of Ålö on track: Profitability improvements in line with expectations despite headwinds from pandemic. Ålö raised group’s sales by €46m in Q2 with an adj. EBIT margin of 12.8%.

Severe Covid-19 pandemic impact on Q2 operations: Including Ålö’s acquisition, total group sales down by -13% to €175m with adj. EBIT of €11m and adj. EBIT margin of 6.3%. Organic sales down by -36% with an adj. EBIT margin of 4.0%.

High operational flexibility: Swift adjustment of production volumes and COGS to sharp drop in demand. Gross margin stable at 25.2%.

Strong cash generation intact: Free cash flow remained positive reaching € +12.1m despite strong sales decline. Net Working Capital as % of LTM sales up to 22.3% due to lower sales.

Positive net income despite massive pandemic disruptions in all our regions: Reported net income reached €5m, aided by a positive finance result and positive tax income. Adj. net income only down -29% to €10m.

KEY FINANCIALS Q2 2020
KEY FINANCIALS OVERVIEW

Organic sales (excl. Ålö) contracted by -36% to € 128m in Q2. Including Ålö, reported group sales declined only by -13% to € 175m in Q2.

The spread of the coronavirus pandemic disrupted business in Q2 dramatically:
- OEMs in Europe and North America shut down production for 3-4 weeks.
- India and South Africa were in total lockdown for 6 weeks.

Some positive effects partially offset these negative impacts:
- the acquisition of Ålö increased JOST’s exposure to the more resilient agricultural market and contributed €46m in sales in Q2 (+23%)
- the strong recovery of the Chinese market for trucks and trailers, which impacted positively other South East Asian economies, too
- higher proportion of aftermarket sales in all regions

Adj. EBIT margin fell to 6.3 % in Q2 as a result of the extremely reduced sales volumes worldwide.

JOST’s adj. EBIT margin (excl. Ålö) was down to 4.0 % in Q2 due to massive demand disruptions in the truck and trailer business. JOST still managed to break-even on an operational level due to its high COGS flexibility.

Ålö boosted earnings significantly in Q2, reaching an adj. EBIT margin of 12.8 %

KEY HIGHLIGHTS

• Ålö improved JOST’s European sales in Q2 with additional €32m (+28%), partially offsetting the extremely weak demand with truck and trailer OEMs.
• With Ålö, reported sales for JOST in Europe only declined by -11% to €104m in Q2
• Organic sales fell by -38% to €72m, heavily impacted by truck OEM plant shutdowns in April 2020 and a rather slow ramp-up in May. Demand for trailer parts and aftermarket business was also significantly below Q2 2019’s levels.
• Adjusted earnings and margins came down significantly in Q2 2020 due to:
  – extremely low sales volumes with OEMs and a slow down of the aftermarket business, compared to Q2 2019
  – high proportion of fixed costs because Europe bears the group’s headquarter costs and most of the R&D expenses.
  – R&D expenses stable compared to prior year, despite lower sales
• Ålö increased earnings in Europe, as the agricultural market was not as strongly impacted by the pandemic, thus allowing JOST to reach operating break-even.
Ålö contributed €14m revenues to JOST’s North American business (+30%), partly compensating the extremely low demand for trucks and trailers. Thus, reported sales only contracted by -20% to €37m in Q2 2020.

Organic sales excl. Ålö decreased by -51% to €23m and were strongly affected by the spread of the pandemic during Q2. The overall production of trucks (-76%) and trailer (-53%) was down dramatically due to truck and trailer OEM shutdowns.

The proportion of aftermarket sales rose compared to prior year, helping JOST outperform the market. However, aftermarket volumes were still down, albeit less than OE business.

Adj. EBIT margin was affected by the massive drop in sales volumes, although JOST was able to reduce COGS in line with sales and also demonstrated a high flexibility reducing its SG&A costs in North America.

Ålö advanced the relocation of its U.S. plant from Telford, Tennessee to Simpsonville, South Carolina, despite the disruptions caused by the spread of the pandemic. Thus, it could contribute positively to adj. EBIT in North America during Q2.

KEY HIGHLIGHTS

- JOST’s sales in China grew significantly during Q2, reaching an all-time high, which partially offset the strong drop in demand in India and South Africa. These two countries suffered from up to 6 weeks of governmental imposed shutdowns during Q2.

- Pent-up demand in China supported by a strong recovery of the Chinese transport demand, allowed JOST’s organic sales in APA to contract only by -10% to €34m in Q2.

- FX-headwinds amounted to -3.7%. Ålö’s contribution to APA sales was only €0.5m in Q2 (+1.3%). Reported sales in Q2 contracted by -13% to €34m.

- Adj. EBIT in APA grew despite slightly lower sales volumes with adj. EBIT margin going up to 16.6% during Q2. This was due to:
  - A highly favorable product mix compared to previous year, with a high proportion of heavy duty products as well as positive catch-up effects in China, leading to record high sales volumes in the country
  - JOST’s ability to scale down production in India and South Africa, cutting costs swiftly to reduce the negative impact of the plant shutdowns
  - Ålö’s contribution to adj. EBIT with above-average margins for the region
Impact of Ålö's Acquisition on Exceptionals

<td>-0.2m</td>
</tr>
</tbody>
</table>

**KEY HIGHLIGHTS**

- During Q2 2020 the major adjustments came from non-operational D&A from PPA amounting to €-7.3m. Thereof €-1.1m result from Ålö’s PPA; the remaining €-6.2m stem from JOST’s historical PPA.
- €-2.6m adjustments resulted from the utilization of inventories step-up during Q2. Further €-5.2m are planned for H2 2020; this effect will phase out at the end of fiscal year 2020.
- Adjustments related to the ongoing optimization project from Ålö during Q2 2020 were offset by a positive one-off effect in the project related to the sale of a property.
Development of Earnings After Taxes and EPS

**KEY HIGHLIGHTS**

- In Q2 2020 reported net income amounted to €5m (Q2 2019: €9.1m) and was influenced by positive taxes as well as a positive finance result.
- The negative effect from unrealized currency losses (non-cash), which resulted from the devaluation of the Swedish krona in Q1 2020, reversed during Q2 2020, leading to a positive finance result in the quarter. Both effects net each other so that the finance result in H1 2020 is on a similar level as in the previous year.
- Adjustments to EBIT in Q2 2020 resulted mostly from D&A of PPA as well as acquisition related exceptionals (breakdown on slide 10).
- Adjusted earnings after taxes in Q2 amounted to €10m (Q2 2019: €14m). Adjusted EPS amounted to €0.66 (Q1 2019: €0.93).
The increase in financial liabilities due to the acquisition of Ålö led to a reduction of ROCE and equity ratio as well as to an increase of net debt and leverage, compared to year-end. This was further exacerbated by low earnings in Q2 2020, as a result of the coronavirus pandemic. Accordingly:

- ROCE fell to 9.4%
- The equity ratio declined to 27.2%
- Net debt rose to €268.0m
- Leverage increased to 2.84x

Liquid assets increased to €113m, compared to year-end, despite the use of €50m cash to finance part of the acquisition. This was mostly due to the significant improvement of the cash flow from operating activities, which resulted in an increase of the free cash flow by €14.9m to €30.2m (H1 2019: €15.4m)
Strong Cash Generation Profile Remained Intact Despite Lower Sales

Cash Flow Overview in Q2 2020

- **Free cash flow (€m)**
  - Q2 2019: 16.1
  - Q2 2020: 12.1

- **Capex (% of sales)**
  - Q2 2019: 1.8%
  - Q2 2020: 2.0%

- **Net working capital (% of sales)**
  - Q2 2019: 20.3%
  - Q2 2020: 22.3%

Commentary

- Cash conversion rate remained strong at 80.7% despite the decrease in adj. EBITDA during Q2 2020. The EBITDA reduction was mostly driven by the negative economic impact of the pandemic on JOST’s sales and earnings. Free cash flow remained positive at € +12.1m despite much lower sales.

- Capex in Q2 2020 amounted to € 3.5m or 2.0% of total sales, thus within expected range of approx. 2.5% of sales for the full year, despite significant decrease in sales.

- The increase in inventories resulted from the consolidation of Ålö. This effect was partially offset by an increase in trade payables. Trade receivables remained stable despite the consolidation of Ålö due to a decrease of trade receivables in the transport business of JOST.

- NWC as % of sales rose to 22.3% due to significantly lower sales in Q2 2020 resulting from the negative impact of the pandemic on JOST’s business.

---

1. Free cash flow = Operating cash flow – capex
2. Cash conversion = (adjusted EBITDA – capex)/adjusted EBITDA
3. Capex = Payments to acquire property, plant and equipment + payments to acquire intangible assets
Outlook 2020
Market Outlook for FY 2020

**TRUCK**

**EUROPE**

(35) – (30)%
Demand for heavy duty trucks expected to improve slightly in H2.

**NORTH AMERICA**

(55) – (50)%
Production of class 8 trucks extremely low. Dealer channels full.

**APA**

(15) – (10)%
Market expectations for APA improved due to a strong recovery in China, which should continue in H2.

**TRAILER**

(25) – (20)%
Strong decline due to the pandemic, following an already weak 2019

(45) – (40)%
The pandemic has affected trailer production but market expectations have improved slightly

**TRACTORS**

(15) – (10)%
Demand for agricultural tractors showing signs of improvements. Market to end on upper end of range.

(15) – (10)%
Demand for agricultural tractors remains weak. Market expected to end on the lower end of range.

Note: Market estimates for heavy truck based on LMC, Clear Consulting and FTR and OEMs announcements (as of August 2020)
Coronavirus pandemic impact on JOST’s business

JOST current observations – situation is extremely dynamic and changes rapidly

EUROPE

TRUCK

All European truck OEMs back in production. Production volumes increased in June and July. Current EDI demand for HY2 solid but below PY.

TRAILER

Most trailer builders except in UK remain open but operate on reduced volumes or with partial short-time work. Recovery in order-intake visible.

TRACTORS

Agricultural OEMs almost back to normal production levels. Demand for H2 seems to be stabilizing and could be back to previous’ years levels in some European countries.

NORTH AMERICA

TRUCK

All truck OEMs open but producing on very low volumes. Markets seemed to have reached bottom in June and volumes are slowly picking up.

TRAILER

North American trailer market also seems to have reached the bottom in June. Trailer builders are back in operations but still producing at low volumes. Further trend remains uncertain.

TRACTORS

Agricultural OEMs back in production. Market demand for high HP tractors has slowed down some, while demand for low HP tractors is recovering swiftly.

APA

Truck market in China up to August with high demand, but legislation change in September adds uncertainty. India market down. Far East, India, South Africa facing increasing Covid-19 cases. 2nd lockdown in Victoria/Australia. Further trend uncertain.

Chinese trailer market also recovered from shutdown with improved volumes. Future trend for other countries in the region uncertain (see above).

Âlö production plant in Ningbo, China, has been producing since March and is back to normal levels.
Outlook for 2020 temporarily suspended

- JOST currently expects Q2 2020 to be the quarter most negatively affected by the economic impact of the pandemic.
- Market signs point to a recovery in most regions from Q3 2020 onwards.
- A dependable update of the outlook will be more likely after OEMs are back from their summer breaks and there’s higher visibility for H2 orders.
- The Management Board is closely monitoring global developments and their influence on JOST’s business and will provide a guidance for the full fiscal year 2020 on September 1st, 2020.
Executive Summary

Q2 2020 strongly affected by spread of the coronavirus pandemic in Europe and the Americas. Strong Chinese market recovery and additional agricultural business partially offset this effect.

Ålö’s strong business performance in Q2 supported sales and raised consolidated adj. EBIT margins. Ålö’s profitability improved in line with expectations despite the pandemic. Integration processes advancing.

Aftermarket slowed down slightly in Q2 2020 but continued to have a positive impact on JOST’s performance, proving its resilience in economic downturns.

JOST will use all instruments available to reduce the impact of the pandemic to its business. Costs and cash focus further enhanced. Positive results of introduced measures seen in Q2.

Currently, we are expecting an economic recovery from Q3 onward. Business in Europe has stabilized and shows signs of improvement. China adding stability to APA region. FY 2020 forecast will be announced on September 1st, 2020.
Earnings in Q2 2020 strongly affected by the impact of the coronavirus pandemic in Europe and North America but also in India, South Africa and Brazil. Transport industry suffered more than agricultural business.
