MULTICAP

MULTICAP COVERING SYSTEMS

Covers your needs, built to last

AN AUTOMATIC COVERING SYSTEM
FOR TIPPERS

Multicap is an automatic covering system for tipper bodies or containers. The hydraulically driven operation makes it fast, reliable and durable. The modular system can be mounted on any (steel or aluminum) body type and varieties.

EFFICIENT

SYSTEM FEATURES

- In-cab control
- Opening/closing within 10 seconds
- Robust solution, lasts full lifetime of tipper
- Modular design: can fit on every body type
- Can fit on steel and aluminum bodies
- Clean side of the cover panels are always on the outside
- Safety during driving, as load is secured in the body
- Good isolation to keep the load warm during transport (usually asphalt)
- Save fuel consumption due to aerodynamics
- Comply with legal legislation to prevent loss of payload during transport

HYDRAULICS

- Hyva has a well equipped hydraulic solution and can give advice or deliver the panels
- The kit is specifically designed for tippers, which can be mounted afterwards (retrofittable) and is an additional package to your standard tipping kit
- Manifold blocks can be mounted direct on drive unit (compact and fast installation)

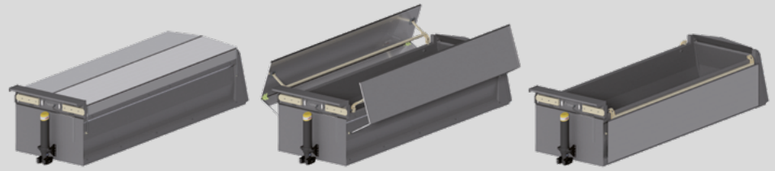
MULTICAP II

For rear end tippers

Product highlights:
- When cover panels are opened, the top rail has no obstructions, free during loading

Product information:
- Hyva dedicated hydraulic kit
- Per body 2 drive units
- Maximum cover panel length is 12 meter (depending on cover panel weight)

Opening movements



MULTICAP IV

For three-way tippers

Product highlights:
- When cover panels are opened, the panels are on one-side of the body. Hydraulic sideboard is not obstructed, free for unloading

Product information:
- Hyva dedicated hydraulic kit
- Per body 1 drive unit
- Maximum cover panel length is 6 meter (depending on cover panel weight)

Opening movements

ON- & OFF-HIGHWAY
